SYNAPSE-ADA.com

INTEGRATED ACCESS SOLUTIONS

DECEMBER 2011

Synapse provides integrated turn-key universal access solutions that empower individuals with disabilities. Helping employers meet their accommodation requirements in the workplace, the Synapse TAP Workstation is the only solution that offers speech recognition on any computer including UNIX, mainframe, Mac and PC platforms. Synapse ADA Workstations provide universal access to users regardless of their disability. We design and engineer solutions for business, government, special needs labs, rehabilitation facilities and libraries. Synapse solutions generally include on-site end-user training, or comprehensive assistive technology training for your staff.

The Synapse ADA Workstation

The Synapse ADA Workstation is the only truly integrated accessible workstation available today. Synapse ADA Workstations are designed for rigorous everyday use in Federal, State and County agencies as well as libraries and other academic environments. Synapse ADA Workstations are used to provide broad access to individuals with the following limiting conditions:

Blindness, low vision, learning disabilities, traumatic head injuries, cognitive disorders, upper extremity impairments, repetitive strain injuries, or a combination of the preceding conditions.

The Synapse TAP System is the only universal access system to permit voice recognition access to all computer platforms. Synapse offers the only solutions for speech access to UNIX, Macintosh, PC, NT and mainframe computers from a single accessing device. Synapse staff members are experts in designing and building accessible environments. Synapse can help you meet your requirements under the A.D.A. Synapse strives to create the most complete and well integrated accessible workstations in the world.

Provide Synapse with your basic requirements; populations to serve, size of population and number of workstations needed and Synapse engineers will design the workstation to fit your requirements and budget.

Designed from the ground up

Synapse manufactures its own workstations with a careful eye towards compatibility and performance. Our support is unequalled and all technical staff are available via cellular telephone at all hours of the day.

Synapse ADA Workstations are used to provide access to individuals with disabilities or as an assessment tool. The staff is well trained in medicine and the limitations imposed on individuals by their condition. A copy of Providing Access to Individuals with a Functionally Limiting Conditions or Syndromes is available upon request.

Synapse leads four-day training seminars on providing access to individuals with disabilities with the Synapse ADA Workstation, adaptive technology and assessment. Attendees are trained on the operation of the workstation and taught the skills necessary to develop a technology needs assessment.

Synapse is committed to providing the very best engineered access solutions for individuals with disabilities.

Martin Tibor, president of Synapse, is an internationally recognized expert in the computer field. Mr. Tibor is widely quoted in the press in such respected publications as the New York Times, Los Angeles Times, San Francisco Chronicle, California Lawyer, Investor's Business Daily, San Jose Mercury, and the Business Journal. Mr. Tibor has been interviewed on ABC, NBC, CBS, MSNBC, CNN World News and Nightline.

Within the San Francisco Bay Area Mr.. Tibor has been seen on KTVU, KPIX, KGO-TV, KRON and heard on National Public Radio and CBS National Radio.

MEET REQUIREMENTS FOR REASONABLE ACCOMMODATION

Meet your requirements for reasonable accommodation under the ADA. The Synapse ADA Workstation is the perfect answer to accommodation requirements for schools, libraries, the workplace or assessment and evaluation centers. The Synapse ADA Workstation offers an integrated solution for individuals with one or more disabilities. A Synapse ADA Workstation provides access to all library, academic and printed materials, online catalogs, databases, Internet, network or Intranet. Basic Full-Compliance Synapse ADA Workstations start at under $10,000.

Synapse ADA Workstations at the San Francisco Main Library

Custom Tailored

Synapse ADA Workstations are custom tailored to accommodate the specific needs of the users you are serving. A fully equipped Synapse ADA Workstation will accommodate users who may be learning disabled, visually or mobility impaired. The Synapse ADA Workstation also accommodates those who may present a cognitive impairment. Numerous foreign languages can also be supported.
A feature-rich workstation may integrate speech recognition, print and screen to speech technologies, screen and print magnification, word prediction, compensatory tools for learning differences, head tracking or other alternative pointing technologies. Braille embossing or refreshable Braille is also available.

Friendly & Accessible

The Synapse ADA Workstation is easy to use and designed to accommodate the needs of the disabled community, Synapse Workstations are engineered to be barrier-free.

Integrated

Synapse ADA Workstation technologies are tightly integrated to provide problem-free solutions in accommodating disabilities where more than one accommodation technology may be required. All hardware and software components are carefully evaluated for compatibility and integrity.

Upgradeable

The Synapse ADA Workstation is designed from the ground up to serve your continuing needs. Synapse Open-Architecture is flexible and ready to accept off-the-shelf

upgrades, unlike the typical dead-end design of other workstations.

Durable

Synapse ADA Workstations meet the demanding requirements of public libraries, academic institutions and rehabilitation centers as the durable solution of choice.

Training

A properly trained staff is key to successfully utilizing your adaptive technology. Synapse training professionals assist your staff in developing the requisite skills to provide appropriate assessments and accommodations. Synapse's patient and knowledgeable trainers will take you through the steps to learn how to successfully accommodate individuals with complex disability profiles.

Support

Knowledgeable Synapse support staff is always ready to assist you in remedying any technical issues.

Service

Synapse ADA Workstations are protected by a full one-year warranty against manufacturing defects. Warranty options can include extended, instant hot-swap and on-site service agreements.

Synapse Full-Compliance Accessible Workstation

SYNAPSE ADA WORKSTATION FEATURES

- Access to library online catalog systems
- Accessible Internet browser
- Large 21" screen for low vision users
- Convert printed text to speech
- Screen magnification
- Access to DOS/Windows applications
- Continuous Speech recognition for mobility impairments and learning differences
- Screen-to-Speech for low vision/blindness and learning differences
- Print magnification software
- Internet/Intranet/network connectivity
- Braille translation software and Braille embossers
- Refreshable Braille displays
- Headmouse or other alternative pointing devices
- Augmentative communication
- Word prediction software
- Eye-tracking

Provide access to:

- Blind
- Repetitive Strain Injuries
- Learning Differences
- Low Vision
- Traumatic Brain Injuries
- Cerebral Palsy
- Muscular Dystrophy
- Multiple Sclerosis
- Quadriplegia
- Retinitis Pigmentosa
- Diabetic Retinopathy and other limiting conditions.

Portable Speech Dictation

Synapse SPK1000 offers the best-engineered solution for portable speech dictation in a mobile package where excellent recognition is paramount. Synapse developed the SPK1000 to specifically address the rigid requirements of speech recognition. Speech solutions require a careful matching of audio characteristics to avoid noise that can adversely affect signal-to-noise ratios and damage recognition accuracy. Attention to detail minimizes the problems in a portable computer caused by internal noise and magnetic fields from spinning motors in drives and fans. Specifications change frequently so the SPK1000 is sold on quotation basis. The SPK1000 is an excellent foundation for a portable Synapse ADA Workstation, an optimal speech recognition portable computer, or an accessor for a Synapse TAP system.

Synapse Visually and Mobility Impaired VMI Workstation

Synapse VMI Workstations were developed as a powerful solution for individuals who are both blind and have no use of their upper extremities. Using continuous speech recognition for high speed dictation and command and control of all software applications tightly integrated with screen access software that will read all text and icons to the visually and mobility impaired user. Synapse VMI provides access in normal or complex work or academic environments. The user can work independently despite the degree of impairment. This is a hands and eyes-free interface where all interaction is through natural speech input and synthesized speech out. The Synapse VMI Workstation is offered with onsite installation and training.

Synapse Literacy and Language Workstation

Synapse Literacy and Language Workstations address reading, writing and language problems. Developed to provide solutions for individuals with a wide range of learning problems, this integrated workstation comes equipped with a broad range of learning tools.

Built from the ground up, the Synapse Literacy and Language Workstation combines optimum hardware and software to meet the demanding needs of the institutional, academic or rehabilitation environment.

Professional level speech recognition assists students with dysgraphia and those whose verbal skills exceed their writing abilities. Outlining applications reinforce the organization of concepts. Word prediction tools support written skills for learning disabled and language delayed individuals.

Robust text-to-speech technology reinforces reading skills by converting written text into easy to understand synthesized speech. A large moving cursor prompts the user to follow along and helps build the association between phonics and written words.

Visual and auditory feedback cues help students with speech disorders improve articulation and develop confidence in their communication skills.

Synapse Literacy and Language Workstations can be custom designed and configured to meet your specific requirements. Individual workstations can be configured to promote learning or to accommodate a student with learning difficulties. A Literacy and Language Workstation can serve as a powerful assessment tool for determining the appropriate technology for an individual with one or more processing limitations. We will be happy to prepare a quotation on workstations tailored to your needs.

The **POWERHOUSE ROOMMATE** system is perfect for the individual who wants to have a fully voice activated telephone plus voice control over devices in a single room. **POWERHOUSE ROOMMATE** allows you to control X10 devices plus up to 30 infrared commands (for voice control over entertainment devices such as TV, DVD, VCR, stereos, etc.). The system allows you to create simple voice commands to control your X10 and IR devices. If you are looking for a trimmed down version of the **POWERHOUSE HOME**, then **POWERHOUSE ROOMMATE** is what you have been looking for.

Key Benefits:

Voice control over lights, appliances, infrared devices (home entertainment components), X10 devices, security systems, heating and cooling, adjustable beds, and countless other devices.
The ability to use the wireless telephone headset as a microphone for your computer and voice recognition software (Can be used with Scansoft's Dragon Naturally Speaking or IBM's VIA VOICE).
ALL of the telephone functionality of SAJE Technology's **COMMUNICATOR BASIC** is included in the **POWERHOUSE HOME**.
An adapter that allows you to connect to any ability switch (i.e. head switch, sip/puff switch, chin activated switch, etc.) for "Wake up" activation of the **POWERHOUSE HOME.**
Auditory feedback of all commands.
The freedom to answer and place calls from within 500 feet of the base station.
The Headset is mountable and can be used in conjunction with our speakerphone option.
No voice training is needed as voice recognition engine is speaker independent.

All voice commands can be custom configured so they are commands that YOU specify. The commands are DIRECT voice commands so there is no "Voice command tree" that you need to go through to accomplish your action. Here are a few examples of commands that our customers have setup:

-Lights on (turns on the lights in the room)
-Watch HBO (changes the channel to HBO)
-Watch Movie (turns power on the DVD player and hits play)
-Bed Up (raises the bed)
-Good Night (Shuts off all of the lights inn the home as well as the TV)

$2,500-$3,500.

POWERHOUSE HOME package includes the **COMMUNICATOR** wireless headset, the base station, 2 rechargeable 2-3 hour batteries, the **POWERHOUSE HOME CONTROL UNIT** which handles all voice dialing commands, X10/Infrared, and voice commands. (Optional Speakerphone is available). If you are looking for the ability to voice control an unlimited number of lights, appliances, infrared devices (home entertainment components), and X10 devices, then POWERHOUSE HOME is what you have been looking for. Just one device or groups of these devices can be controlled with a single voice command. You also have the ability to control security systems, adjustable beds, and countless other devices. An unlimited number of voice commands that YOU specify can be created on this system. It also gives you remote web access for home control if desired. As a bonus, ALL of the functionality of the SAJE TECHNOLOGY COMMUNICATOR telephone products are included in the functionality of the **POWERHOUSE HOME**!

Key Benefits:
Voice control over lights, appliances, infrared devices (home entertainment components), X10 devices, security systems, heating and cooling, adjustable beds, and countless other devices.
The ability to use the wireless telephone headset as a microphone for your computer and voice recognition software (Can be used with Scansoft's Dragon Naturally Speaking or IBM's VIA VOICE).
ALL of the telephone functionality of SAJE Technology's **COMMUNICATOR BASIC** is included in the **POWERHOUSE HOME**.

Option for SWITCH CONTROLLED backup if desired.
An adapter that allows you to connect to any ability switch (i.e. head switch, sip/puff switch, chin activated switch, etc.) for "Wake up" activation of the **POWERHOUSE HOME**.
Auditory feedback of all commands.
The freedom to answer and place calls from within 500 feet of the base station.
The Headset is mountable and can be used in conjunction with our speakerphone option.

NaturallySpeaking

These solution save time by enabling you to dictate into your computer at up to 160 words per minute. Train your voice file in less than five minutes. NaturallySpeaking understands and executes your navigation, formatting, and editing commands in Microsoft Windows applications. It also enables you to launch and switch between applications. BestMatch III technology improves recognition accuracy that is already the best in the industry. Supplied with a total vocabulary of 250,000 terms (160,000 active), the Vocabulary Builder feature analyzes your documents automatically to find and add new words, specialized terms, acronyms, and proper names. Add new terms and create new vocabularies for different subjects. An excellent tool for ESL challenged writers and those with better verbal skills than writing skills.

The Prodessional, Medical and Legal series products support custom macro commands that enable you to insert boilerplate text, launch applications, fill out forms, and perform other complex tasks with a spoken word or phrase. Dictation Playback enables you to hear what you said in your own voice to facilitate editing. Text-to-Speech reads e-mail messages and other documents aloud. NaturalWeb lets you browse the Web by speaking URLs and links, and dictating into online forms. Generate text by dictating into an approved recorder for transcription later by your computer.

Dragon NaturallySpeaking Professional Solutions

Dragon NaturallySpeaking Professional 11 enables busy professionals to create documents and e-mails, fill out forms, and streamline workflow tasks—all by speaking! Dragon NaturallySpeaking is about three times faster than typing, and up to 99% accurate. Talk to your computer and your words instantly appear in the full Microsoft® Office® Suite, plus Microsoft Internet Explorer, Corel® WordPerfect®, Lotus® Notes®, and virtually all other Windows®-based applications. And even better, you can create voice commands that execute multi-step computer tasks instantly—imagine the time you'll save! Dragon NaturallySpeaking Professional 11 is section 508 certified, and offers complete hands-free use of the PC for users with disabilities. Dragon NaturallySpeaking Professional 11 also includes optional tools for network deployments, such as support for Citrix thin clients.

PROFESSIONAL FEATURES

AMAZINGLY ACCURATE!
More accurate than ever before, Dragon NaturallySpeaking® 11 is often more accurate than typing. Dragon NaturallySpeaking never makes a spelling mistake, and it actually gets smarter the more you use it!

FASTER THAN TYPING!
Most people speak over 120 words per minute, but type less than 40 words a minute. Dragon NaturallySpeaking lets you create letters and e-mails about three times faster than typing by hand! SO

EASY TO USE!
You'll be dictating letters, e-mails and surfing the web by voice right away! No script reading required to get started. We even include a full set of on-screen tutorials, and an approved noise-canceling microphone.

USE WITH ANY WINDOWS PROGRAM!
Use your voice to dictate, edit and control virtually any Windows application, including the full Microsoft Office Suite, Microsoft Internet Explorer, and Corel® WordPerfect®. NETWORK READY!
Use Dragon NaturallySpeaking from any PC on your organization's network, including a Citrix thin client.

BLUETOOTH SUPPORT
Use Dragon NaturallySpeaking with Nuance-approved Bluetooth headsets. Convenient to use with a Tablet PC system!

MOBILE
Dictate into any certified handheld device for automatic transcription when you synch with your

PC. HANDS FREE
Dragon NaturallySpeaking is Section 508 certified to give people with disabilities complete hands-free use of the PC. The ideal tool to assist people with carpal tunnel syndrome or other repetitive stress injuries.

Attainment Company

Read to Learn Bundle

The Read to Learn Software Bundle incorporates Attainment's eReader program, which has many excellent features for the student and teacher alike.

It reads stories aloud to students with professional narration. Text is highlighted word by word, by line or by complete sentence. Students can also click on any individual word to hear it read. Graphics are plentiful, contemporary and age-appropriate. A test at the end of each story also provides speech support plus an optional hint feature that directs students to the page that addresses each question.

A unified management system helps the teacher quickly review or print out student performance data. Teachers can determine reading lists and set options that best suit each student's learning style. Choose word-by-word or natural speech narration, select text highlighting approach and assign tests.

Windows only (2000, XP, Vista), touch screen and single switch compatible. Available on one DVD or six separate CDs.

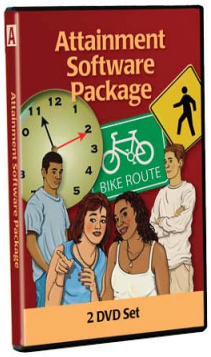
Bundle includes the following software:

* Life Skill Readers eReader
* Social Story Readers eReader
* Safety Skills Reader eReader
* Connections in the Workplace eReader
* Do The Right Thing eReader
* Self-Determination eReader

Read to Learn Bundle RTL-B76 $299.00

REQUEST INFORMATION ON CURRENT BUNDLING AND PRICING

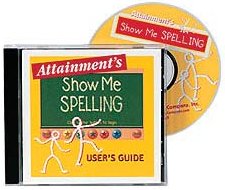
$200 MINIMUM ORDER



Attainment Package

The Attainment Software Package includes age-appropriate software emphasizing functional life skills, work skills and basic math and literacy skills. The 44 programs (delivered on individual CDs or on a two-DVD bundle) cover art, social, life, work, math, and literacy skills for students, plus teacher utilities like GoTalk Overlay Software. Attainment's programs are known for their clarity of presentation, age-appropriateness of content and ease of use. Each program is also available separately.

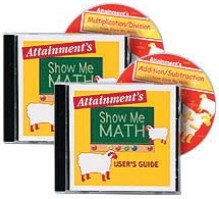
Attainment Package ASB-D25W **$2,295.00**



Show Me Spelling CD

Functional spelling for low-level readers. Show Me Spelling allows even the most struggling reader the opportunity to succeed at spelling. All 600 spelling words have corresponding speech with pictures. Appropriate for any age and a wide range of ability levels. Includes instruction and quiz modes. In the instruction mode, you create a spelling list by selecting words from our word bank, or choose from dozens of preselected lists. You can adjust the difficulty of the program by offering students helpful spelling hints, like showing the next letter. If the student is still stumped, she can choose the "Show Me" option. Here, a short animated movie will present the correct spelling. Incorrect responses don't appear so students can't give wrong answers. This allows for extended independent work by those with limited spelling skills. You can select an option that also plays a "celebration" movie when a student spells a word correctly. The quiz mode lets you implement a pre- and post-test strategy to evaluate student progress. You can easily save students' word list and quiz scores. Students spell by using the standard keyboard or on-screen alphabet. Show Me Spelling is touch screen and IntelliKeys compatible.

Show Me Spelling SL-07W **$129.00**

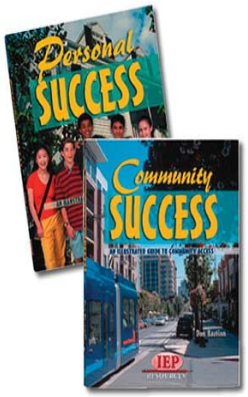


Show Me Math

include no number greater than twenty and each math problem can be illustrated with an animated movie. Assessments evaluate student progress with detailed record keeping. The instructional module helps students visualize math problems. Users can select answers on the keyboard, or by clicking on a number . . . or the student can choose the "Show Me!" option. Here, the answer is illustrated with a short animated movie. For example, 5–3=2: Five sheep, three walk away, leaving 2 sheep. Choose from four animated characters: Sheep, ants, beans and ping-pong balls.

Show Me Math **$99.00**

Success Package



A step-by-step approach to independent living activities. Includes Personal Success and Community Success in software and print formats. The multimedia software programs feature an engaging, easy-to-use interface that combines realistic illustrations with text and speech. The books present activities with reproducible, black-line illustrations. Personal Success targets 53 important activities for personal care—both simple and challenging. Activities are organized into topics: Personal care and hygiene, dressing for success, and clothing care. The software lets you organize activities to reflect a naturally occurring sequence, like washing hands, brushing teeth, and using floss. Community Success integrates social skills with a step-by-step presentation. the 45 activities are organized by category: Shopping, transporation, eating out, important places, and appointments. Software is delivered on Win/Mac CDs, IntelliKeys, touch screen and single-switch compatible. The books are covered spiralbound. Componets available individually or in this money saving package.

Success Package SU-27W **$289.00**

WordWise

Functional literacy with pictures, words and speech. WordWise combines pictures, words, speech and print features to form a comprehensive language enrichment package. Students can record their pronunciation of words and compare it to the program. Create an individual word list to build vocabulary. All 588 illustrations are realistic and appropriate for any age. Program includes instruction and multiple choice options. A new feature presents the written word with or without a picture. You can easily create a personalized word file for each student, or choose from seven preselected lists: Community, house, people, outdoor, actions, and adjectives. Printout custom picture books for each user. Picture printouts can be large, medium or small; color or black and white.

WordWise **$999.00**

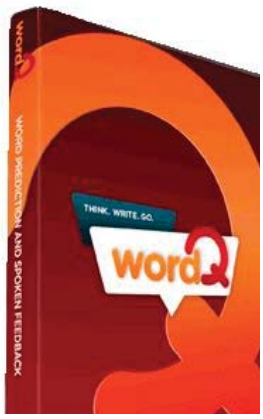
Looking for Words

Combines community awareness, reasoning skills and vocabulary building. Excellent for reading enrichment because it helps teach hundreds of words in context. Features "explore," "list," and "picture print" options. In "explore," students move to 24 locations, learning new words as they go. Select any object and it identifies itself. In "list" option, students search home, school and community for specific words. Use "picture print" to create student activities or illustrated booklets. Scores are saved to track skill development.

Looking for Words **$99.00**

WordQ 2

WordQ 2 software is a writing tool used along with standard word processing software. It suggests words for you to use and provides spoken feedback. Users of all ages who have problems writing and editing can benefit. Install WordQ and begin using it immediately with any word processor. State-of-the-art word prediction suggests words when you have trouble spelling or choosing the right word.Text-to-speech feedback enhances writing and editing. Letter echo confirms typing a character. Word echo helps you self-identify spelling errors. Word echo also confirms your selection of a predicted word. Sentence echo helps you hear the word flow in a sentence to decide whether the right words and punctuation are used.A special text-reading mode helps you proofread. With Microsoft Word, WordPad, Notepad, or Outlook, text can be highlighted and spoken word-by-word within that application. WordQ writing aid software currently supports Canadian and US spelling. Through the creation of user files, the tool can be tailored to your personal writing needs. To further enhance your writing experience, WordQ software adapts to your writing style and improves its performance as you use it.



Windows Compatibility:

WordQ works with all versions of Windows from Windows 98 to XP and Vista.

Works with all applications:
WordQ provides word prediction and speech output wherever you type without additional confusing windows. There is no need to identify the target application. Just click within the application and WordQ works there immediately.

Simplicity and ease of use:
Features have been carefully selected and designed to provide you with the most benefits while ensuring simplicity and reducing confusion.

State-of-the-art word prediction:
WordQ uses advanced prediction technology to suggest suitable words when you have trouble spelling or choosing the right word. These can be spoken to help you choose a word.

Adaptive vocabulary:
You can choose a vocabulary level appropriate to yourself (starter, intermediate, advanced). As you write with WordQ, it will learn your writing style and extend your vocabulary to include correctly spelled works derived from a large background dictionary.

Topics:
WordQ makes use of an unlimited number of writing topics to increase accuracy of prediction within a topical area. WordQ more sensibly uses one topic at a time. You can switch topics readily at any time, e.g., between sentences or paragraphs.

Text-to-Speech:
WordQ's speech features are available everywhere. Speech enhances writing and editing by helping you make choices and to self-detect mistakes. WordQ allows you to read directly within an application, rather than copying the text to another window or with a talking animated character which is distracting for users with learning/attention problems. WordQ incorporates a very simple interface for browsing and speaking documents.

Spelling
The WordQ Dictionary may be referenced for its 60,000 words and powerful knowledge base of how words are used. It also checks for the proper spelling of words as you type. A number of initial user vocabularies are included based upon elementary, intermediate, and advanced writing styles. You can further customize the user vocabulary by adding novel words and by importing text files.

Prompting
WordQ tightly integrates visual and auditory feedback such that a variety of prompts are presented to help the user make choices and to self-identify mistakes. It is based on the assumption that users with learning difficulties have oral skills that are generally better than reading skills. They can use their general language sense to monitor their writing, and catch errors in grammar, spelling and punctuation that might otherwise go unrecognized.

Predicted words
The word list presents predicted word choices as a visual prompt of possible words that might be appropriate. Each word is highlighted and spoken emphasizing the *visual/auditory shape* associated with a word. This is important when the user has difficulty reading a word based on its component letters. (A mouse may also be used to highlight and speak a word.)

Typing echo
The next level of prompts involves echo feedback of typed letters, words, and sentences. Any combination of these may be activated:

- ***Letter echo***
- ***Word echo***
- ***Sentence echo***

Reading text

The final level of prompting is reading the text at a sentence level. This level is fully available in Microsoft Word, WordPad, Notepad, and Outlook. The user then begins reading the sentence by pressing the spacebar. The sentence is then spoken with each word highlighted word-by-word again emphasizing the visual/auditory shape of each word. All of this is done directly in the word processor application. At the end of the sentence, the sentence is highlighted again so that the user does not lose their place. The user can also manually step through the sentence word-by-word by using the right and left arrow keys to help locate an error. Another reviewing option is to highlight the text (e.g., several sentences or just a few words) first and then press the *Read* button. In this case, the highlighted selection is read with word-by-word highlighting and the Read mode is automatically exited when the selection is read.

Single User **$225.00**

School Volume Licensing	1 Computer	5 Computers	10 Computers

School-wide Network Licensing
10 computers $1,950 plus $25 for each additional computer.

SpeakQ

What can I do with *SpeakQ*?

You can do everything that *WordQ* does, plus you can write by speaking. At any time you have the choice of typing with the keyboard, using word prediction, or speaking straight into your text. Speech recognition and word prediction are integrated to enhance the effectiveness of each other. You can train *SpeakQ* to recognize your speech using texts provided that match your reading level or you can write your own training texts. An innovative training interface makes training simple. Just listen to the computer speak and repeat after it!:
Once you have finished training, you can begin dictation using one of two dictation modes:
In the **Speak and select** mode spoken words are displayed as a list of choices enhanced by word predictions. You then select from the list of words or phrases (using the keyboard or mouse), or type letters to further refine the suggestions.
In the **Speak continuously** mode your spoken words are typed directly into your document as you say them.
Recognized words and phrases are immediately read aloud to help you identify mis-recognitions. To help you make any corrections, highly accurate word predictions are suggested by combining speech with predictive information. As a result, the desired word can be selected with a minimum number of keystrokes.

Microsoft English (U.S.) v6.1 Recognizer is now included with *SpeakQ*. An option has been added to permit users in school settings to store their *WordQ* vocabulary files and *SpeakQ* speech speech files on a central server instead of the local workstation. This capability permits a student to move from workstation to workstation and have access to their *WordQ*/*SpeakQ* settings available wherever they log in. Network administrators can find out more about enabling this option by viewing the FAQ

SpeakQ enables users to dictate words into any standard Microsoft Windows document in either a continuous or discrete word-by-word manner. *SpeakQ* is used in combination with *WordQ 2*, a writing tool with advanced word prediction and text-to-speech capabilities. Together, these tools provide an integrated and flexible approach to writing, and assist students with their spelling, proofreading, and editing activities. Students now have the option to dictate text, type on their keyboard, choose word predictions from a list, or alternate between these methods, each of which has been optimized to enhance the effectiveness of the other.

SpeakQ supports two styles of dictation. Like other speech recognition products, it allows users to dictate text directly into their documents. In addition, it also supports a style of dictation that is unique to *SpeakQ*. This approach uses word prediction capabilities and introduces a concept we call “speech-enabled word prediction.” In effect, spoken words are displayed as a list of choices enhanced by word predictions. Users select from the list of words, or type letters to further refine their choices. By using this approach, not only can students control the words that are entered into their documents as they speak, but they can also improve the accuracy of the words. Consequently, they can spend less time correcting recognition errors, and more time on the real task of writing.

	SpeakQ
1-Computer	$199.00
5-Computers	$675.00
10-Computers	$1,282.50
Network License	10 computers $1,950 plus $25 for each additional computer.

WYNN is the innovative literacy software tool designed to enhance success for individuals with reading challenges and writing difficulties. WYNN was developed with the help of special educators and individuals with learning difficulties such as dyslexia, dysgraphia and aphasia. By using a bi-modal approach - simultaneous highlighting of the text as it is spoken WYNN transforms printed text into understandable information that benefits readers of all ages including English Language Learners (ELL), struggling readers and children with ADD (attention deficit

Two versions of our software for learning to read and write are available
WYNN is available in two versions: WYNN Wizard and WYNN Reader. Both these computer programs read text aloud while highlighting spoken words, include the four color-coded toolbars, and provide reading, writing, studying, productivity, and Internet features.

WYNN Wizard, our premier product, is scanning and reading software. It includes optical character recognition (OCR), the ability to scan printed pages and convert them into electronic text. Speech synthesis enables this scanned text to be read aloud. Additionally, WYNN Wizard can read word processing documents, Adobe Acrobat PDF files, text files, and the Internet.

WYNN Reader includes all features of WYNN Wizard except OCR, or scanning capability. Additionally, files that have been previously scanned and saved using WYNN Wizard can be read with WYNN Reader.

WYNN Wizard single user:	$950
WYNN Reader single user	$375

Pricing per License: 5 to 9
Choose any combination of WYNN Wizard and WYNN Reader.

Network WYNN Wizard per license:	$765
Network WYNN Reader per license:	$299

10 to 24 Floating Licenses

Network WYNN Wizard per license:	$745
Network WYNN Reader per license:	$289

TestTalker™

TestTalker is a software solution designed to help individuals be more successful with test taking, worksheet completion, and study materials. It also aids completion of electronic forms. TestTalker provides a computerized version of a test, worksheet, or other form that can talk.

Freedom Scientific's Learning Systems Group is pleased to introduce a partnership between Don Johnston's Start-to-Finish® Books and LSG's TestTalker. The extremely popular Start-to-Finish Books provide a controlled reading experience with a bi-modal auditory and visual feedback. Now users of Start-to-Finish Books will be able to download the quizzes in TestTalker format, free of charge.

TestTalker is used for both test preparation and standardized tests to assist our users with test creation.

TestTalker is a software solution to help individuals be more successful with test taking, worksheet completion, and with study materials. It can also help people complete forms electronically. TestTalker provides a computerized version of a test, worksheet, or other form that can talk. TestTalker uses the same bimodal approach-simultaneously highlighting words as they are spoken aloud-that is used in WYNN, the Learning Systems Group's other product.

TestTalker maintains the integrity of the written test by not modifying the test. TestTalker is an accommodation tool that provides a bimodal presentation of the unmodified written information.

TestTalker has two modules: the Teacher Edition, a test-creating module designed for teachers; and the Student Edition, a test-taking module. The Teacher Edition scans pre-printed tests and allows teachers to configure them so students can complete the tests electronically. The Student Edition reads the test aloud and allows students to answer the questions. Teachers and students can print the blank or completed tests if they wish.

TestTalker supports True/False, Multiple Choice, Fill-in, and Extended Answer tests. The product includes a PDF (Adobe® Portable Document Format) converter so teachers can simply This is a picture of the test after the student has completed it using TestTalker: Student Edition.open a PDF file in TestTalker without needing to scan.

TestTalker is valuable in helping students become better prepared for test-taking. TestTalker enables students to become familiar with specific testing formats. It provides a bimodal approach, which enhances learning for many students and helps empower students to feel successful. TestTalker also better prepares students for taking tests on the computer. Considering the increasing popularity of this method of test delivery, it serves as a tool for individuals to practice completing tests by computer.

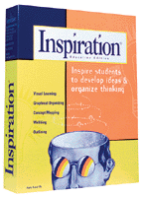
ORGANIZE YOUR THOUGHTS AND IDEAS

Inspiration® is a powerful visual learning tool that inspires students to develop ideas and organize their thinking. Diagram and Outline views teach students how to convert their free-form thinking into a graphical and hierarchical structure. Enter ideas into the visual view and then click a button to convert to an outline. Switch between views to enable students to bridge between non-linear and linear organization. 1250+ symbol shapes are provided. Thirty-five templates help get started with concept mapping and webbing. Visual toolbars make Inspiration easy to learn.



Drag and drop subtopics. Work on multiple topics. Split topic feature quickly reorganizes a topic into two topics. Promote, Demote and Collect and Move topics within the outline.

Direct Internet connection: Type in a web address to instantly create a hyperlink. Improved HTML Exports. Create web pages with hyperlinks through HTML export. Internet graphic support. Supports JPG and GIF, so you can add images to your diagrams from the web. Inspiration is Windows XP, Vista compatible.

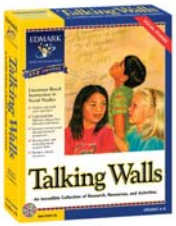
EDMARK/RIVERDEEP CLASSROOM



Talking Walls Bundle, Talking Walls and Talking Walls: The Stories Continue students discover the stories behind some of the world's most fascinating walls. The award-winning books, interactive software, carefully chosen Web sites, and suggested classroom activities build upon each other, providing a rich learning experience that includes text, video, and hands-on projects. Students' perspectives about the world will expand as they study the historical, cultural, and political issues related to each wall's region.

The Talking Walls Bundle is a wonderful springboard for a student's journey of exploration and discovery. This comprehensive collection of researched resources and materials enables students to focus on learning while conducting a guided search for information. **Mac/Win**

Talking Walls Bundle School Version CD	**$89.95**
Talking Walls Bundle Lab Pack	**$229.95**

Virtual Labs Light and Electricity 6th-12th Single	**$99.95**

Touch Window portable touch screen takes advantage of children’s natural desire to reach out and touch what they see on the computer screen. Move objects, pull down menus and draw graphics, all with the touch of a finger!

17" Serial	**$395**
17" USB	**$395**
19" USB	**$450**

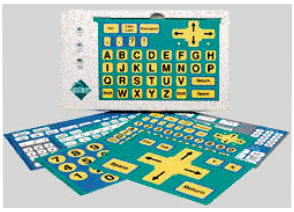
LCD MagicTouch monitors and overlays available in all sizes. Contact us for details.

Touch Free Switch is a versatile, switch access solution. The combination of a digital video camera and easy-to-install switch software provides flexible and customizable click capabilities for users with limited ability to use traditional switches. Up to XP and OS8.6 and higher

Mac/Win $249

INTELLIKEYS

IntelliKeys USB plugs directly into the keyboard port of a Macintosh,® PC-compatible, or Apple IIGS computer. Slide in an overlay and you're up and running. Each standard overlay has a bar code that is instantly recognized by IntelliKeys. People who use switches can choose from two built-in programmable switch jacks. IntelliKeys works with all software-if the software runs with a regular keyboard or mouse, it will work with IntelliKeys from IntelliTools and several other publishers.



Built-In Access

IntelliTools understands the access needs of people with disabilities. For the user that has difficulty pressing two keys simultaneously, IntelliKeys allows the user to press the SHIFT key followed by a letter key to type a capital letter-two keys in succession, not two keys at one time. For the user who cannot use a mouse, IntelliKeys comes with a standard arrows overlay, allowing the user to move the cursor in any direction (IBM compatible mouse access through AccessDOS and Access Utilities for Windows).

Smooth Operation

IntelliKeys retains the memory of custom overlays and special settings for disability access. IntelliKeys uses its own 32K of battery-supported memory built in, so that custom overlays and special settings remain, even when the computer is off.

Comes with eight standard overlays

Four elementary overlays are designed for people of a young cognitive age. They contain the right keys to work with common software programs. Keys are large and well spaced for physical access. Arrangements are alphabetical and logical for cognitive access. Contrasting colors enhance visual access. QWERTY overlays for Macintosh and PC-compatibles are excellent for people with strong cognitive and visual abilities, but more limited fine motor skills. Use the QWERTY overlays with special settings for enhanced physical access. The setup overlay allows you to make many special accommodations for physical access. For people who inadvertently drag their fingers across unwanted keys, the response rate can be adjusted. For those who cannot use a mouse, you can turn IntelliKeys arrows into mouse arrows with completely adjustable speeds! For people who remain on a key too long, you can adjust the repeat rate.

IntelliKeys Keyboard USB
w/ IBM-Mac USB cable IK-USB-F01 $395.00

	Single Copy	Five Pack
Access Bundle #4: Intellikeys USB, Overlay Maker 3	$510.00	$2,380.00

Access Bundle #6: OverlayMaker 3 and Classroom Suite	$439.00

Intellitalk®
Word processor combining text, speech, and graphics. Built-in scanning and automatic overlay generation provide IntelliKeys® and switch access to assist students with disabilities learning to read and write. (Overlay Maker® is required to edit and print overlays.) Teachers can develop tailored activities with locked text, on-screen palettes, and graphics inserted from other sources. Includes spell checker, pre-designed activities library, and expanded item library. Mac/Win.

NOT AVAILABLE INDIVIDUALLY. NOW BUNDLED IN CLASSROOM SUITE ONLY

Overlay Maker®
Create custom overlays for use with IntelliTalk II®, IntelliMathics™, IntelliPics®, or ClickIt!® to facilitate access to curriculum content. Design your overlay (or start with an automatically generated overlay), assign keystroke commands, then print the overlay on a color or black-and-white printer. Keys can include any graphics or text. Mac/Win.

Platform	Item #	Single Copy
Mac/Win	OM-MW-iii	$139.95

Reading: Balanced Literacy
Essential elements of reading instruction

- **Phonemic awareness:** Extensive attention is paid to the connection between the letters and phonemes of English and their sounds (sound/symbol method).
- **Phonics:** Explicit phonics instruction is based on the word families or word "chunks" method.
- **Decoding and encoding:** Decoding by analogy is a reliable and easy-to-understand strategy that students can build on.
- Activities help students spell over 140 decodable words, and practice is provided with decodable books for each unit included in the blackline masters. Nine Anchor Books provide ample opportunity to read leveled text.
- **Fluency:** Multiple opportunities to read text on screen, as well as structured writing activities, provide practice in fluency.
- **Vocabulary:** Vocabulary development in context is provided on screen and in the Anchor Books. Black line masters include vocabulary-building activities for each unit.
- **Comprehension:** Every story includes tools to help students understand what they have read and concludes with questions to assess comprehension.

Single Copy	Five Pack
$299.00	$1,196.00

MathPad Plus for Grades 3-8 Single Copy
Includes Fractions and Decimals Mac & Win $99.95

IntelliPics Studio®
Works with IntelliKeys® to create interactive, animated activities, with pictures from the IntelliTools® Picture Library or graphics from other programs. Activities can be made with IntelliPics® for students from young children (who can touch pictures on IntelliKeys® to bring up animated graphics) to higher cognitive adults (who can give full multimedia presentations by pressing keys on an overlay). Overlays for custom activities are generated automatically. (Overlay Maker® is required to edit and print overlays.) Mac/Win.

NOT AVAILABLE INDIVIDUALLY. NOW BUNDLED IN CLASSROOM SUITE ONLY

IntelliMathics™
Open-ended tool and curriculum product to teach math concepts through the use of on-screen manipulatives. Works with IntelliTalk II®. Accessible through mouse, switch, and IntelliKeys®. (Use Overlay Maker® to edit and print custom overlays.) Mac/Win.
NOT AVAILABLE INDIVIDUALLY. NOW BUNDLED IN CLASSROOM SUITE ONLY

Window-Eyes Professional is nothing less than the most stable screen reader available on the market today. Featuring Windows 98, Me, 2000, XP, Vista compatibility, Window-Eyes puts you in the hands of the most powerful screen reading software ever created.

Window-Eyes gives total control over what you hear and how you hear it. Plus, with its enhanced Braille support that control is extended to what you feel as well. On top of all that, the power and stability of Window-Eyes means that most applications work right out of the box with no need for endless tinkering in order to get them to function properly.
Window-Eyes is your key to opening the doors of a world with unlimited information.
A world where work takes precedence over technical hassles. Window-Eyes is a leading software application for the blind and visually impaired, which converts components of the Windows operating system into synthesized speech allowing for complete and total access to Windows based computer systems. Window-Eyes integration into Windows is seamless, providing you with instant access to the operating system without having to learn a complicated set of keystrokes.
Applications that utilize standard Microsoft controls will be spoken automatically with little to no configuration necessary. Other applications may require simple modifications to Window-Eyes whose options are easily accessible via a well organized, speech control panel.

The Window-Eyes User's Guide (available in a multitude of formats -- see below) provides detailed instructions and examples for beginning configuration options such as voice parameters and verbosity, as well as advanced instruction for tasks such as setting up user and hyperactive windows, and creating customized settings for individual applications.

System Requirements: The system requirements for Window-Eyes should match, or exceed, those of the recommended Operating System specifications where Window-Eyes will be installed. For information on recommended Operating System specifications, please refer to http://www.microsoft.com.* Additional Recommendations: For software speech, a multichannel sound card, such as the Sound Blaster Audigy or Sound Blaster Live, is strongly recommended (Note that increased RAM will assist in the performance of software speech). Allow 10 MB hard-drive space for each additional Eloquence language installed. For Internet browsing, Internet Explorer 6 or greater is strongly recommended. * Requirements may vary depending on your system configuration and applications installed

LANGUAGE SUPPORT
Through the use of software speech, Window-Eyes offers the following voice support:

- US English Eloquence 5.0
- UK English Eloquence 5.0
- Castilian Spanish Eloquence 5.0
- Mexican Spanish Eloquence 5.0
- French Eloquence 5.0
- Canadian French Eloquence 5.0
- German Eloquence 5.0
- Italian Eloquence 5.0
- Portuguese Eloquence 5.0
- US English Microsoft

(Call for a multi-user or other license arrangements that you need).

(NOTE: Purchase an SMA with your new license for only $145 for the first seat & $100 per additional seat if purchased with new product, saving $50.00 on the first seat and $25 per additional seat!)

Math Talk ® Math Entry Through Speech

This package allows the user to voice any math from prealgebra, algebra, trig, calculus, statistics, thru Ph.D. and graduate level. This includes voicing graphs! Operates Scientific Notebook™ (SN) with over 600,000 combinations of voice commands. SN is powered by MuPad™ and has GRAPHING capabilities. SN will also evaluate, evaluate numerically, factor, combine, expand, simplify, check equality, solve exact and more. **$350.**

Scientific Notebook ® Math

This software makes teaching and learning math easier. Ideal for reports, homework, and exams. Scientific Notebook allows you to seamlessly create documents containing text, mathBraille .**$175.**

BRAILLE TRANSLATORS

MegaDots Braille Translator word processor works with your choice of input hardware, speech, printers and embossers. The user-friendly, WYSIWYG editing environment displays Braille or text (including dots, ASCII and large print) and always has detailed, context-sensitive help right where and when you need it.

The file importer automates translation and style-based importation of files. MegaDots recognizes up to 50 programs and can import and translate most text formats, including Macintosh and HTML. Files are imported and formatted using fully customizable styles, and round trip translation is virtually error-free. Inkprint capabilities create beautiful Braille, large print and standard text in inkprint. Compatible with Windows, 7, Windows XP Vista and Windows 98 or DOS 6. **$595**

INDEX Everest is the only high-speed (324 PPH) Braille embosser that works with normal cut sheet paper (80-180 gsm) and produces a Braille document ready for binding or mailing. High speed, high quality and ease of use make the Everest an excellent choice for homes, schools, the workplace and Braille production centers that prefer single sheet printing system. Speech feedback makes it easy to install and operate for blind and sighted users alike.

Everest V4 **$4,295**
Everest Acoustic Hood **$945**

INDEX Basic - Braille Embosser for continuous tractor-fed paper. The high-speed (Basic-D 340 PPH, Basic-S 170 PPH), high quality, ease of use and small size, makes Basic an excellent choice for homes, schools, the work-place and Braille production centers. The Basic is controlled by an ink and Braille labeled front panel. Speech feedback makes it easy to install and operate for blind and sighted users alike.

Basic-D V4 **$3,295**

SPEECH SYNTHESIZERS

DECtalk USB is a compliant full speed USB device that starts and stops quickly and can meet the demands of any screen access program. The DECtalk USB is a fully programmable device that may receive firmware updates while in the field.

As an added bonus, the DECtalk USB comes equipped with a standard serial port. If the synthesizer is operated solely on the serial port, the unit can be powered via a supplied D.C adapter or by connecting the unit to a computer via the supplied USB cable.

The DECtalk USB has 9 predefined voices, 140 volume levels, 75-650 words per minute, numerous unique pitches, and is fully configurable to meet your listening needs. In addition, parameters such as tone, punctuation filtering, and intonation are also adjustable. It is important to note that these settings may be limited by certain software packages such as screen access programs.

DECtalk USB **$695**

Print Production Embosser

4Waves PRO
Large scale, around the clock Braille embossing is here. With 4waves PRO your production won't stop. It offers user friendly, high speed Braille embossing. The multi printer design facilitates service and use.
Key features
Tractor fed paper
High embossing speed
Module design: 4 modules + one service module
Minimum down time during mainteinance
Low noise level
Around the clock embossing
4Waves PRO is ready to emboss 24 hours a day. The embosser consists of four individual modules. They simultaneously emboss 1 000 pages per hour. 4Waves PRO automatically adjusts to any number of inserted modules. For high speed, high quality production without halts.
Easy maintenance
One service module is included with 4Waves PRO. If one of the modules should need maintenance, it is easily replaced with the service module. The exchange takes a few minutes and does not require any tools.

Braille Embosser 4Waves PRO . $25,950

BRAILLE EMBOSSERS

Juliet Classic

•Double sided
•Basic value in interpoint Braille
•Extra-wide Braille line (up to 56 characters)
•Up to 55 characters per second

Juliet Classic's standard features include regular Braille graphics, high resolution Braille graphics, and Dynamic Braille Scaling. With Dynamic Braille Scaling, you can turn on different Braille sizes, even within the same document. Built-in Braille sizes include Library of Congress Braille with or without increased line spacing, California sign Braille, Jumbo Braille, or the smaller Braille often preferred by Japanese customers. Regular or high resolution Braille graphics make maps, simple line drawings, or math more accessible.
An impact control on the rear panel allows you to select perfect Braille heights for different paper grades. Sixteen menus allow you to customize your embosser just once for every task you need and call all the settings into action with a few keystrokes. Adjust for 6 or 8-dot Braille, even print sideways. Use a variety of paper sizes.

Juliet Classic **$3,995**

Romeo Pro 50

•Tough, transportable, single-sided and feature-rich
•40 character (standard Braille) line
•50 characters per second

Romeo Pro 50's standard features include ET Speaks, our fast and flexible speech system, and our Single Sheet Tractors. ET Speaks comes up talking automatically without ever slowing you down. Even while echoing the commands you enter on Romeo Pro 50's keypad, ET Speaks can still keep working as the voice of your DoubleTalk LT-compatible screen reader and play WAV and other audio files in DOS and Windows. Single Sheet Tractors let you hand-feed non-tractor paper, like letterhead or other special media, one sheet at a time.
Other standard features on Romeo Pro 50 include Dynamic Braille Scaling, as well as graphics in two intensities, normal and high resolution.

Romeo Pro 50 **$2,995**

Romeo Attache $1,995
Romeo Pro Attache $2,195

Juliet Pro

•Double sided
•Feature-packed wide-line interpoint
•Extra-wide Braille line (up to 56 characters)
•Up to 55 characters per second

Juliet Pro also comes with our Single Sheet Tractors and ET Speaks, our innovative speech system, as standard equipment. These two additional features make your Juliet Pro adapt to an even larger range of applications.
Single Sheet Tractors enable you to feed in single sheets of letterhead or card stock, one at a time by hand, so you can place Braille easily on materials without the customary tractor holes of Braille paper.

ET Speaks comes up talking automatically and makes using your embosser far easier, because it echoes commands you enter on the keypad and "reads" all the embosser's status messages out loud. ET Speaks is DoubleTalk-compatible, so it can also read your computer screen and play audio files all at the same time. Like Juliet Classic, Juliet Pro's standard features include regular Braille graphics, high-resolution Braille graphics, and Dynamic Braille Scaling, which enables you to choose different Braille sizes. Select increased line spacing, California sign Braille, Jumbo Braille, or the smaller Braille often preferred by our Japanese customers. You can even mix Braille sizes within a document.

Juliet Pro **$4,495**
Juliet Pro 60 **$4,495**

BRAILLE EMBOSSERS

Romeo 25

Tough, transportable, single-sided value
40 character (standard Braille) line
25 characters per second
Romeo 25 is a rugged basic embosser with a singular reputation for outstanding Braille quality and durability. Ideal for student, personal or home office use, Romeo 25 also has many of the popular features of our larger embossers and is an unbeatable value at $2,195, the lowest price in its long history.

Options such as ET Speaks and Single Sheet Tractors are no longer available for Romeo 25 (for these, see the new Romeo Pro 50).

Standard features on Romeo 25 include Dynamic Braille Scaling, as well as graphics in two intensities, normal and high resolution. Dynamic Braille Scaling lets you change Braille sizes, even within a document, from Library of Congress Braille to California sign Braille, Jumbo Braille, standard Braille with increased line spacing or the smaller Braille often preferred by our Japanese customers. With Romeo 25's two graphics modes, you can make Braille graphics at normal intensity for large shapes or at high resolution for better detail.

Romeo 25 comes ready to work with your IBM-compatible PC's parallel port and has a 9-pin serial port as well. Sixteen menus allow you to customize your embosser for every task you need. Adjust for 6 or 8-dot Braille, even print sideways. Adjust your Romeo 25 to make multiple strikes per character for extra-emphasized dots or to allow for heavier materials. Print on regular paper by turning down the impact control. Use a variety of paper sizes. Reprint up to 99 copies of one document automatically with Multi-Copy.

Romeo 25 **$2,495**

ALVA Satellite Series. Satellite braille displays feature the most enhanced ergonomic design to date. This extends the navigation and operation possibilities of most popular screen readers, and increases productivity. With twin satellite key pads, double touch cursors, three status cells, and activation of speech feedback from the braille display, the ALVA Satellite braille displays allow you to be twice as productive, twice as creative. Satellites are equipped with a USB connection and an internal power adapter.

ALVA 544 Satellite Traveler for a notebook (44 cells). **$5,595**
ALVA 570 Satellite Pro for a desktop (70 cells). **$9,295**
ALVA 584 Satellite Pro for a desktop (80 cells) **$10,295**

Therapy Tables - Therashape

A durable, long-lasting investment for your clinic, center, or school, Therapy tables enable rehab-specific procedures such as hand therapy, powder therapy, and restorative therapy, for individuals or groups. With superior knee clearance and impressive height ranges, our tables go one step further—they address the ergonomic and safety needs of the therapist, too. A powder-coated steel base provides years of durability. Two-year warranty. Standard features: Adjustment is in 1-inch increments by loosening a knob and then re-tightening. Legs are steel with a powder-coated finish. The inner column is galvanized to resist scratching

Our quarter-round table offers a versatile solution for school or healthcare settings. The three adjustable legs provide access and offer no-hassle adjustability. The table design offers ample seating room for four people, making it ideal for group instruction or therapy. The legs easily adjust using an oversized knob. A powder-coated steel base provides years of durability.

KA-8546 **$650**

The three station curved table is ideal for access by wheelchairs. All legs are adjustable using an oversized knob. This unique table wraps around the therapist, allowing treatment of several clients at the same time. The table provides a 10" adjustment range, from 23" to 33". The four leg design offers ample knee space. The table measures 72" long x 18" deep. Therapist cutout area is 30" wide x 36 " deep. Amber maple top with powder coated steel legs.

KA8546 **$699.**

The two station squared table is idea for one on one hand therapy with gas assist lever. Now you can achieve the perfect work height for every situation, whether you're conducting hand strengthening exercises, or putting on a splint. The dual recesses allow the therapist and client to sit closely together. Our counterbalance system allows the table to "float" up and down until you find the right height and lock the table in place. The 36" diameter table is 1-1/8" thick, and adjusts from 24" to 36". Laminate top has an amber maple finish.

KA5564 **$625.**

EASYTALK

EasyTalk is a compact, lightweight (2.1 pounds), easy to use communication device with up to 56 minutes of high-quality digitized recording. Thanks to the EasyTalk's eight recording levels, ET communicators have greater opportunity for expression.

No Language Barriers
Because the recording feature allows you to record anyone's voice (man, woman, or child), it will naturally record in any language.

Scanning
Users able to operate 1 or 2 switches or a joystick, have complete access to any message stored at any level on the EasyTalk. There are four scanning options: Row/Column, Linear, Vertical and Horizontal.

Variable Length Messages
Each key can record a message of any length. Recording time is limited only by available memory.

Flexible
With the simple flip of a switch, the touch panel can be changed to accommodate the following overlays (key layouts): 4x10, 4x5, 2x5, 2x2, 1x2, 1x1

Long Battery Life
The EasyTalk's high capacity Nickel-Cadmium batteries ensure extended operation (up to 12 hours on a single charge).

EasyTalk comes with a charger, 6 color overlays, 6 blank overlays, and an instruction manual.

SPECIFICATIONS:
Message Capacities:
8, 16, 24, and 32 minutes of standard play and up to 14, 28, 42 and 56 minutes of extended play.

Battery
Nickle Cadmium, 7.2 V, 10 hours normal operation

Battery Charger
Input 120-V AC, 60Hz 20W
Output - 12V DC 800 mA.

INTERFACES:
Sound Input Port - for external microphone
Sound Output Port - for external speaker
Two Switch Input Ports – for standard external switches and joystick

Dimensions - 12" x 4" x 1.25"
Weight - 2.2 pounds Environment
Operating temperature - 14° to 122° F.
Storage temperature - 4° to 140°F

Pricing Info

EasyTalk - 8 min	**$999**
EasyTalk - 16 min	**$1,099**
EasyTalk - 24 min	**$1,199**
EasyTalk - 32 min	**$1,299**
EasyTalk - Case	**$90**
EasyTalk - Keyguards	**$90**

Call Alarm
The EasyTalk can call for help when any key is held five seconds longer than the hold time.

Higher Sensitivity
The EasyTalk's highly sensitive touch-panel guarantees continuous, fully active key areas, with no frustrating "dead spaces." The touch sensitivity can be adjusted to accommodate different motor needs.

Backup and Upgrading
The e-talk's message library is easily saved to your PC, and software upgrades can be downloaded from the internet to your PC and transferred to the e-talk.

DIGICOM 2000

DigiCom 2000 units can be purchased with up to 142 minutes of recording time. This means that a user or groups of users can have a wide range of messages - from single words to sentences and paragraphs. With 48 levels divided into six user groups, DigiCom 2000 communicators have greater opportunity for expression.

Higher Sensitivity

The DigiCom 2000 has a highly sensitive touch-panel that guarantees continuous, fully active key areas, with no frustrating "dead spaces." The sensitivity of the panel can be adjusted to accommodate different motor needs. It is also possible to transfer and copy messages and functions from one key to another, without the need to re-record or re-program them.

Your Own Message Library

The DigiCom 2000 also has the ability to save an unlimited number of voice messages by simply copying them to a floppy disk using a DigiCom 2000 Disk Drive. A library of special messages can be built for the user to accommodate different situations.

Flexible Programming

The DigiCom 2000 has an exclusive, built-in electronic display that provides step-by-step instructions and guides you through the programming process. It also allows you to review and edit previously programmed sequences at the touch of a button. In addition, messages can be lengthened on any key - without having to re-program the entire level.

Keyboard Layouts

DigiCom 2000 comes with a set of 18 overlays, some pre-printed and some blank. They vary in size from 1 X 2 (2 keys) to 4 X 12 (48 keys). The blank overlays can be copied and customized with any combination of symbols, letters, or handwritten messages.

DigiCom 2000 comes with a charger, 18 blank overlays in all key layouts, shoulder strap, and an instruction manual.

SPECIFICATIONS:
Display
Liquid crystal super twist w/2 rows, 16 characters each. Touch Panel: 9.12" x 4.10"

Message Capacities
The DigiCom 2000 comes in 4 recording time amounts – 34 minutes, 70 minutes, 106 minutes, and 142 minutes.

Battery - Nickle Metal Hydride, 7.25 V, 10 hours normal operation charger - input 120-V AC, 60Hz 20W; Output - 12V DC 800 mA.

Quick and Easy Communication

The DigiCom 2000 has several features to assist the user in his or her communication. Individuals who use direct selection are aided with programmable enter, exit, and hold-down times. People who use scanning will find enhanced visual and verbal cues to assist the visual or auditory scanner. Additionally, users can take advantage of sequence prediction to aid in remembering symbol sequences.

Unequaled Value

The DigiCom 2000 has more built-in capabilities and standard accessories (such as 18 different overlays, shoulder strap, wall transformer, and instruction manual) than any other portable, digitized aid. And it's surprisingly affordable too. In fact, when you compare it feature-for-feature, the DigiCom 2000 offers a communication value that's unequaled among digitized devices.

e-talk

The e-talk takes augmentative communication to another level. With the e-talk you really can have it all. Want a dynamic screen picture-based device? You've got it. Want an on-screen keyboard with text-to-speech communication? You've got that too. How about mixing digitized and synthesized speech on the same page? You can do that also. Want functional design; touch screen input, and glorious transparent colors? It's all yours with the e-talk.

Powerful enough to fit all cognitive needs from the most basic to the most sophisticated, the e-talk features dynamic screen software that allows a custom communication system to be easily created for nearly any user. Featuring the popular Mayer-Johnson picture symbol system, the dynamic screen software facilitates the creation of communication screens that flow from one to another allowing smooth creation of verbal communication. Pictures can be mixed with text and systems can be created ranging from completely picture based to completely text based or any combination in between.

ADVANCED TECHNOLOGY:
Synthetic Speech
(DECtalk® or L&H TTS 3000®)

Available in 5 Translucent Colors
Downloadable updates
Accessories available for the e-talk include a carrying case, keyguard, switches and a wheelchair mounting system.

E-Talk CS 6400
(6.4" color display) $3,499

e-talk CS 8400
(8.4" color display) $4,699

Text-to-Speech
Speech output can be text-to-speech, using either DECtalk® or any of the many Lernout & Hauspie languages, or high quality digital recordings. The volume is loud. The text-to-speech is outstanding. The recorded sound quality is awesome! This speech device is meant to be heard!

Digitally Recorded Speech
No language barriers. Because you can digitally record anyone's voice (man, woman or child), the e-talk can speak in any language.

Display
The e-talk features a black and white dynamic, transflective display, which can be viewed in the brightest sunlight. For indoor, or nighttime viewing, the display is backlit by super-bright LED's, which will activate even in freezing temperatures.

Input Methods
Input is by touch screen or scanning using either pictures or letters or both. The e-talk touch screen is programmed to accept finger touch. The user does not have to use his fingernail or a tool to get an input. There are jacks for one or two switches and the e-talk can be fully switch operated.

Variable Length Messages
Each key can record a message of any length. Recording time is limited only by available memory on the e-talk. There are no recording limits on any key. The e-talk can be purchased with 16, 32, 48, 72, 96, and 128 minutes of digital recording time.

Flexibility and Ease of Use
The e-talk is shipped ready to use, with a communication system designed to introduce the feeling of the e-talk. It includes some picture symbol communication pages, some letter based communication pages and access to the more than 3600 Mayer-Johnson picture symbols. Pages can be created in four key layouts: 2x2, 2x6, 4x6, and 4x8. Key layouts can vary on a page-by-page basis.

Backup and Upgrading
The e-talk's message library is easily saved to your PC, and software upgrades can be downloaded from the internet to your PC and transferred to the e-talk.

e-Talk Tablet

Our newest addition to the e-talk family is the e-talk Tablet. The device features a 1.0 GHz processor and has built-in networking capabilities to surf the web. With a screen resolution of 1024 x 768, hi-res digital photos can be viewed with no problems. Word Process, listen to MP3s, or watch video's on this trendy and powerful device. Anything you would ever need to do can be done using our e-talk Tablet.

Note: The e-talk Tablet is offered as a stand-alone communication device, or as a normal operating tablet PC. Medicare and Medicaid only funds dedicated speech devices, thus the e-talk Tablet with Windows XP Home is not covered.

Specifications
Operating System:
Windows XP Embedded (dedicated)
Windows XP Home

Display: Ultra Slim 12.1" XGA Panel, 150cd/m2 Luminance touch screen
Resolution: 1024 x 768
Dimensions:11.53" x 8.66" x 0.94"
Weight 3.3 lbs
Battery:Rechargeable 3600mAh Lithium Ion (3.5 hours of extensive use)

Networking Capabilities: Wireless 802.11b LAN module
10/100 LAN on board
56kbps modem module

Interfaces
Sound Input: Built-in microphone and external mic port
Sound Output Port: Used for external speaker

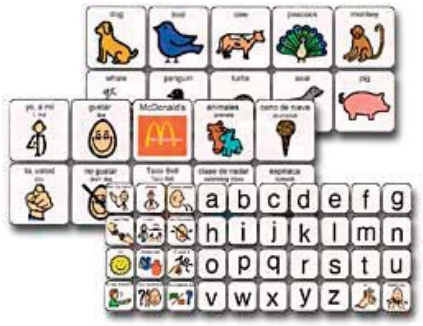
Note: e-talk Tablet with or without cradle comes with your choice of Windows XP Embedded (dedicated) or Windows XP Home

BOARDMAKER

Boardmaker is a wonderful graphics database containing over 3,000 Picture Communication Symbols in bitmapped clip art form. Make a professional looking communication display in minutes. Quickly find and paste pictures into your display with a mouse click. Make the pictures any size and with any spacing.

Print and/or save your display on disk for later use. Print displays in black & white or color (if you have a color printer). Store, name, retrieve, resize, and paste scanned or custom-drawn pictures. Make worksheets, picture instruction sheets, reading books, journals, or posters. These may be made in Boardmaker or by pasting the pictures in your desktop publishing program.
Languages included: English, Spanish, French, Swedish, German, Norwegian, Danish, Italian, Portuguese, Dutch.

Language features of Boardmaker™:
Each symbol is translated into 10 languages and may be found and printed in any of the languages. This means that you can build a communication board in any language without being able to speak it.
Symbols may be copied with
1) no text above the symbol,
2) one language above the symbol, or
3) any two languages above the symbol.
Additional languages may be added by typing over existing languages.



Boardmaker™ Includes:
3,000 Picture Communication Symbols from Books I, II, and III.
Each Boardmaker comes with a set of black and white symbols and a set of color symbols.
A drawing program.
Assorted premade blank grids for EasyTalk, DigiCom 2000 and other speech devices.
A Boardmaker manual and Picture Index.
A video showing you how to use Boardmaker. **$399**

ACCESSORIES

Keyguards
For users with motor control problems, keyguards help guide the finger onto the key. Before purchasing a keyguard, the overlay key size needs to be established.

EasyTalk comes in 3 key layouts:
4x10, 4x5, and 2x5. $90 ea.

DigiCom 2000 comes in 4 key layouts:
4x12, 4x8, 2x6, and 2x4. $90 ea.

Carrying Cases
These carrying cases are soft, padded, water resistant, and have handles and shoulder straps. Inside, a heavy plastic panel protects the device, yet allows the user to speak by simply pressing on the panel. A special compartment in the top flap carries extra overlays.

E-talk Carrying Case	**$90**
EasyTalk Carrying Case	**$90**
DigiCom 2000 Carrying Case	**$90**

One by Four Talker
Four small talkers in one sturdy, press-and-play case.
OT-40 **$69**

Go Talk Overlay Software
Creating overlays that look great is easy with new Go Talk Overlay Software! Includes over a thousand photos and illustrations, plus you can paste your own images into any overlay. Overlay cells can contain an image, text or both together
GoTalk Overlay Software **$59**

Pocket GoTalk
It's a compact 25 message talker: five easy to activate buttons with five levels.
GO-05W **$199**

Go Talk 4+
Another portable, easy-to-use and very durable communication tool, featuring four super sensitive 3" x 3" message buttons.
GO-04 **$179**

GoTalk 9+ is lightweight and rugged, like all GoTalks, and now has a 45 message capacity (9 keys, each 1 3/4" x 2 1/4", and five recording levels). Plus three "core messages" which stay the same on each level so you don't need to re-record essential messages for each level. Plus all new technology providing great sound and volume control. Plus easier sequential recording, an option for whole level erasing and built-in overlay storage. And even with all of these new features, it's a GoTalk so it's still easy-to-use and affordably priced!
GT-09E **$199**

Picture CD Bundle
Five interactive programs help students perform everyday activities independently. Instructors sequence pictures and students review them at the computer. Or, print out pictures to use in actual activities. Features 450 picture cues, quality speech, printouts of personalized picture lists and a choice between display and multiple choice presentations.
Picture Cue Bundle **N/A**

GoTalk 20+ is lightweight and rugged, like all GoTalks, and now has a 100 message capacity (20 keys each 1-inch square, and five recording levels). Plus five "core messages" which stay the same on each level so you don't need to re-record essential messages for each level. Plus all new technology providing great sound and volume control. Plus easier sequential recording, an option for whole level erasing and built-in overlay storage. And even with all of these new features, it's a GoTalk so it's still easy-to-use and affordably priced!

GT20E **$249.95**

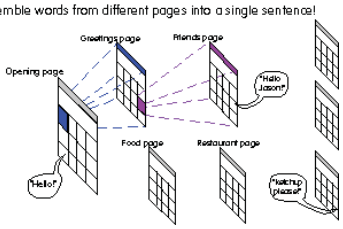
Features	Plus
20 message keys	5 "core messages"
5 recording levels	great new sound quality
100 message capacity	built-in overlay storage
15 minutes recording time	faster record and erase
1 year warranty	

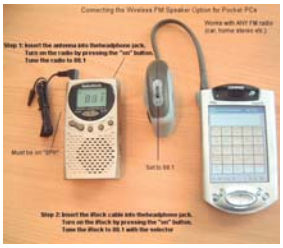
Gus Pocket Communicator

This product is designed for people with communication or speech disorders who require a small, user friendly speech system and have the physical ability to use a hand held computer. It offers unlimited pages of words and phrases, along with the ability to create new words and phrases on-the-fly. This unit is compatible with any Pocket PC from any manufacturer (HP, Compaq, Dell etc.).

Software only	**$895.00**
Complete Pocket PC with software installed	**$1,795.00**
Wireless Pocket Speaker System	**$125.00**
Micro Keyboard for Compaq iPaq	**$85.00**
Symbol Set for Gus! CD Pocket PC Communicator	**$175.00**
Rugged Case for Compaq iPaq	**$175.00**

How does a "dynamic display" speech system work?
Selecting a sound button (square) will say a word/sentence OR open a new page of speech choices!!
Assemble words from different pages into a single sentence!





Gus! Multimedia SpeechPro

SpeechPRO combines both an on-screen keyboard (top half) and a "dynamic display" expanding grid (bottom half) on a single screen. Designed for text and/or symbol based communication. Includes 5,500 communication symbols and Neospeech Premium voices.

SpeechPRO is INCLUDED with all our Windows based speech packages. FREE software upgrades and tech support for life.

Customize any or all cells to your liking...
1. •Action: Speak or Open a New Template (page)

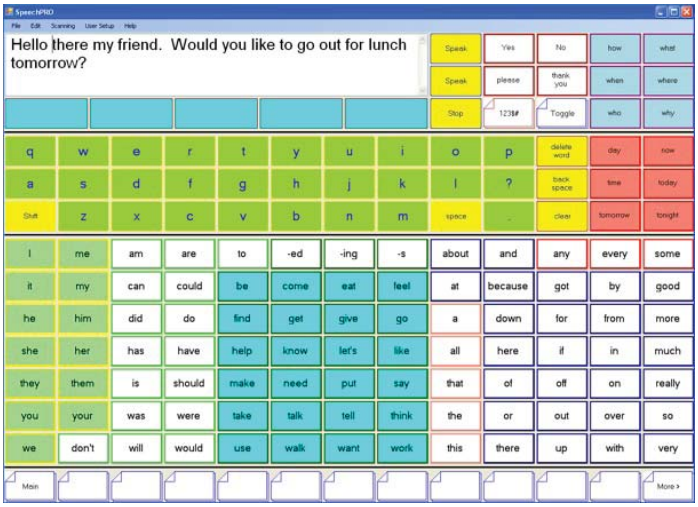
SpeechPRO supports unlimited pages to create a fully functional "dynamic display AAC" system, using text and/or pictures.
2. •Name: The text... "Hello"...that appears on the button
3. •Value: The text to speak for the button..."Hello there, how have you been?"

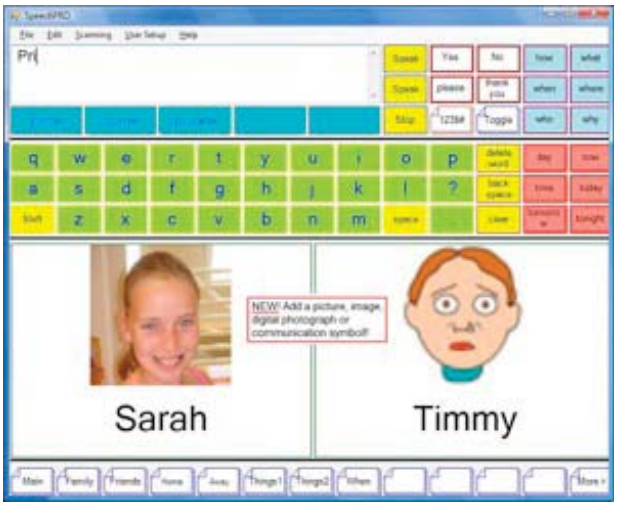
Each button can contain text of any length.
The spoken text isn't limited by the text "label" displayed on the button.
4. •Fully customized buttons. Font size, color, type and characteristics (bold, italic etc.). Add a digital photograph or a communication symbol! Even make a button "invisible" to remove distractions and improve scanning efficiency. Buttons accept characters from any language.
5. •Picture: SpeechPRO supports communication symbols, graphics and digital photographs.

SpeechPRO includes a complete library of over 5,500 communication symbols.

SpeechPRO includes a alphabetic vocabulary file named wordlist.txt , however, a vocabulary file with a language vocabulary other then English can be used instead.
Simply rename your text file (eg. GermanVocab.txt) to wordlist.txt, save it into the SpeechPRO folder (C:\Program Files\SpeechPRO) and SpeechPRO will use that vocabulary.

$895





CUSTOM ERGONOMIC SEATING

These are the best quality ergonomic chairs you will find at this affordable price. Select exactly the ideal base, post, back and seat that are right for your needs. Designed in cooperation with the Repetitive Strain Institute, these chairs are remarkably comfortable. Comprised of formaldehyde-free thick and resilient cushions, standard and organic fabrics or leather. Chairs may be ordered as shown or configured exactly for your body type and preference. Accommodates folks who may be too tall, short or heavy for standard designs with your choice of post, base, seat, back, arms or adjustment mechanism that is most appropriate for their needs.

Request pricing for custom configurations. See sizing chart on next page.

SEAT SELECTION GUIDE

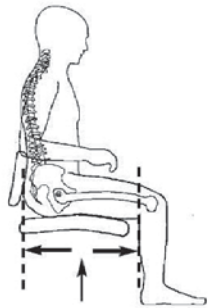
1. Choose Seat Style

	SomaComfort™ formerly BioComfort™	SomaForm™ formerly BioForm™
a) Seat Shape	Concave:	Convex:
b) Seat Firmness	Softer seat	Firmer seat
c) Seat Width	Narrower seat. Best for slimmer bodies and straight-leg sitters.	Wider. Best for pear-shaped body type and V-sitters.

2. Choose Seat Size

a) Measure Sitting Length using ***FIGURE A***

FIGURE A
Sitting Length



Measure distance from the back of the knee to the back of the back to determine sitting length

b) Use ***CHART A*** below to determine seat size based on measured thigh length and mechanism choice. Seat slider allows seat to adjust 1″ shorter and 1.5″ deeper

CHART A

SomaComfort™: *formerly BioComfort™*

Sitting Length	Seat Size w/ N, S, R, or K
under 14″	1
14″ - 16″	2
15″ - 17″	3
16.5″ - 18.5″	4
18″ - 20″	5 & 6
19.5″ - 21.5″	5 & 6 w/ SS
over 21″ SS set at Max	5 & 6 w/ SS

SomaForm™: *formerly BioForm™*

18.5″ - 21″	5 & 6
20″ - 22.5″	5 & 6 w/ SS
over 21″ SS set at Max	5 & 6 w/ SS

BACKREST SELECTION GUIDE

1. Choose Backrest Style

Low Backs (Recommended mechanism: S for maximum low back support)	• Ideal for people who like to sit upright and who do a lot of data entry. • Supports the low back and lumbar region, by stabilizing the hips. • Relaxation achieved by sitting balanced over the spine unloading on top edge of backrest.
Midheight Backs (Recommended mechanism: R & K for maximum complete back support)	• Ideal for people who multitask and are in and out of their chair often. • Designed to keep shoulder blades free to form a naturally supported open posture. • Supports the low back and lumbar region, the spine.
Tall Backs Recommended mechanism: R & K for maximum complete back support)	• Ideal for people who like to recline and people with neck problems. • Designed to keep shoulder blades free to form a naturally supported open posture. • Supports the low back and lumbar region, the spine, and the neck. • Relaxation achieved by slightly reclining and resting the entire upper body against the backrest.

2. Choose Backrest Size

a) **Low Backs:** •Choose backrest size based on the width of the backrest. The backrest should not impede the free movement of the users arms

b) **Midheight Backs:** •Same as Low Backs

c) **Tall Backs:** •Same as Low Backs
•Measure torso height (see ***FIGURE B***) to determine which tall backrest to choose (see ***CHART B***)

FIGURE B

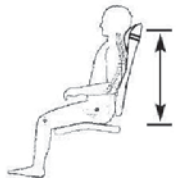

CHART B

Sitting Height to Nape-of-Neck Height

< 22″: 26″ Tall Back (i.e. TAs TBs, or TCs)
22″ - 29″: 32″ Tall Back (i.e. TAt TBt, or TCt)

ELECTRIC LIFT ADJUSTABLE FURNITURE

Adjustable workcenters are designed for both freestanding or system use and are our most economical sit-to-stand offering. The Varitask XR series offers offer 26.5 of vertical adjustment from 24" to 50.5".

Equity Series

The Equity Series of workstations provides equal access and comfort for people of all abilities and statures. Features hand crank adiustment.

Equity 1317 Bi-level Computer Work-Station With Hand Crank Adjustment

The ideal solution when frequent adjustment is needed to accommodate students who use wheelchairs. This flexible workstation accommodates students of all ages and abilities. Two easy-to-turn hand cranks provide infinite surface adjustment (between 24-38 inches) to meet the functional requirements of students with disabilities and the requirements of the ADA. The keyboard and monitor sections adjust independently for adequate knee clearance space for wheelchair users and the appropriate view height when using a computer. Two-Year Warranty.

Standard features: Durable laminate surfaces. The keyboard surface measures 48w x 13d; and the monitor surface measures 48w x 17d.

Equity 1317	**48"x13", 48"x17"**	**$1,147.00**
Equity 4830	**48"x30"**	**$872.00**
Equity 4240	**42"x42", 40"x17"**	**$1,250.00**

Accella Series

The Accella Series offers adjustable task height with the simple turn of a hand crank

Accella 6030 Computer Workstation / Activity Table With Hand Crank Adjustment

Attractive and modern, this height-adjustable table is ideal as a wheelchair accessible activity table or computer workstation. Especially appropriate when frequent adjustment is needed, this ADA-compliant computer workstation for assistive technology adjusts from 27-39 inches with an easy to turn hand crank that folds underneath. Comes in four sizes. Two-Year Warranty.

Standard features: Durable laminate top 1-1/8" thick, heavy 3mm PVC edgebanding, powder coated steel feet, advanced hydraulic lift system, fold-away crank, floor levelers, lift capacity 450 lbs.

Accella 6030	**60"x30"**	**$1,126.00**
